5.8 million Americans age 65 and older are living with Alzheimer's or a related dementia. The lifetime costs of family care for a person with dementia average over \$200,000 or about \$273.00 a month.

**But we can help!**

Through funding provided for Alzheimer's Disease and Related Disorders, we are able to work with families- people with dementia- and people caring for those with dementia- to help cover the costs of medical supplies, environmental equipment, monitoring devices, and more.
